

WOMEN VOTERS IN 3 CLASSES

Indifferent, Undirected and Interested, Mrs. O'Bannon Says.

LAUDS DEMOCRATS

Urges Use of Ballot Because It Forms Common Ground With the Husbands.

The three types of women voters are the indifferent woman, the undirected woman, and the interested woman, Mrs. W. R. O'Bannon of Miami, district chairwoman for the democratic committee, told precinct committeewomen for Tulsa county yesterday afternoon in the municipal auditorium. "It is your duty as precinct committeewomen to interest the indifferent woman, convince the undirected woman, and to employ the interested woman as workers," Mrs. O'Bannon admonished. "The surest means of winning is by organization and we hope to have the whole state of Oklahoma a perfect network of organization from the congressional district down to the county and on down to the voting precinct, which is the unit of political government."

Other duties which devolve upon the precinct committeewomen are informing themselves on the vital issues in the campaign, learning all registration and election laws and becoming personally acquainted with every democratic woman in the precinct of which the committeewoman has charge, Mrs. O'Bannon said.

Commend Administration. Mrs. R. L. Fite of Tahlequah, who attended the national democratic convention, was also a speaker at the session, which was presided over by Mrs. S. R. Lewis, county chairwoman. At the close, resolutions commending the administration of the government during the war period and the past eight years were adopted.

Mrs. O'Bannon declared that women should use the ballot because of their close relationship to government. "Since the war women have more clearly seen their close relationship to government," Mrs. O'Bannon said. "Those mothers

who lost their sons during the war know how close this relationship is. Just as long as women are the mothers of men they must have a fundamental right to exercise the franchise. Use of the ballot will also increase a woman's gift as a mother and a wife in the home, for it will make her more companionable to her husband by creating a common interest."

Natural, Born Democrats. Mrs. O'Bannon then stated that all women are natural born democrats because, "The democratic party is the best instrumentality whereby democracy can express itself in the operation of the government," and, beginning with the birth of the love of democracy in the human heart, told of the organization and subsequent record of the democratic party. In conclusion she lauded the administration of the nation's affairs under President Wilson and stated the position of the party on the league of nations.

WHEAT DEMANDS ON CARS HEAVY

Oklahoma to Move 16 Million Bushels Export States.

OKLAHOMA CITY, July 17.—Sixteen million bushels of wheat in Oklahoma will have to be moved in the next three months, J. W. Mulhern, field worker for the interstate commerce commission estimated today after a survey of the state wheat situation.

"Oklahoma will receive absolutely equitable treatment at the hands of the interstate commerce commission," he said, "but the car shortage will be acute in all points in the wheat belt. Oklahoma has a great advantage over other sections in that the threshing season starts several weeks earlier, and every bushel that can possibly be moved before other states begin petitioning for cars, should be shipped."

Broken Arrow Briefs

BROKEN ARROW, Okla., July 17.—Funeral services were conducted at the Methodist church South in this city Friday for Rev. Edmond Ellis Dobson, a pioneer Methodist minister and an early settler in this vicinity, whose death occurred Thursday at Sand Springs, where he had made his home for some time. The remains were accompanied to this city by a number of friends and relatives, and many former friends and neighbors of this city also attended the obsequies. Rev. G. W. Griner, pastor of the

local church, had charge of the services both at the church and Park Grove cemetery, where interment took place. Rev. Dobson was within 18 days of his 82nd birthday, and is survived by six children and a number of grandchildren.

A brief funeral service at Park Grove cemetery yesterday afternoon preceded the interment of the bodies of Willis Lewis Pierce and David Winfield Pierce, aged 7 and 16 years respectively, and sons of Mr. and Mrs. W. W. Pierce, whose bodies were recovered from a swimming hole in a small stream on their father's farm at 10 o'clock Thursday night after a three-hour search. The first intimation the parents had of the tragedy was the failure of the lads to return from the pasture with the cows at milking time and the search led to the discovery of the boys' clothing on the bank of the stream, from which the bodies were recovered by the father. The bodies were clenched together, indicating that both lives were lost at the same time. The other children of the family are a daughter 5 years and an infant son. The bodies were removed to the Leonard morgue at 8:30 and prepared for burial.

A democratic rally was held at the city hall Saturday evening with Hon. J. M. Springer of Tulsa as the principal speaker, followed by other county candidates. Operated by compressed air, a machine has been invented to rub down the paint on automobile bodies and save much hand labor.

FORM FINGERPRINT COMPANY

Tulsa Heads Concern for Making Titles by Use of Prints.

OKLAHOMA CITY, July 17.—The making, issuing and selling of abstracts of titles authenticated by fingerprints was set forth as the business purpose of the Jenkinson Fingerprint Abstract company, which today applied to Joe R. Morris, secretary of state, for a corporation charter. Capitalization of the company was fixed at \$10,000. The officers are R. K. Shipman of Tulsa, and Gus Thompson and J. R. Johnson, both of this city.

It was learned from the articles of incorporation that the company contemplated protecting titles to automobiles and other personal property which may be stolen by the addition of fingerprints to ordinary signatures.

The Spanish government is repeating experiments tried some time ago to produce tobacco profitably in that nation.

A KANSAS CITY MANUFACTURER

Highly endorsed and recommended, offers a small block of common stock to investors looking for a safe, conservative and profitable opportunity. A few lucrative positions to be offered these stockholders. Executive will be in Tulsa within a few days. For particulars and interview, address Box F-235, care of Tulsa World.
